erie water treatment

# Only the best for both you and the environment.

**During our time on this planet, there is one undeniable fact: we all need water. It goes without saying that we are the guardians of our water and handle it with care. Not only for our own health, but for nature as well.**

Water is essential to life. In fact, your body is mostly water. About every 7 weeks, that water is renewed, mostly by what you drink. Each day, under normal conditions, the average adult naturally loses 2.5 to 3 liters of water. That water must be replaced. A person can live 40 days without food, but will not survive more than 2 or 3 days without water. That's why it's so important to hydrate properly. And that's easier said than done! The composition of water differs from town to town, which means tap water differs from one place to another and may contain impurities which have unpleasant effects. Water, for example, can contain calcium and magnesium that make the water 'hard' and can cause aggressive limescale buildup in water-using appliances and fixtures. Hard water is also very unpleasant for your skin and hair. Calcium that builds up on your hair can weigh it down and dry it out.

# What will a water softener do for you?

**Our IQsoft water softener is the perfect and most advanced solution to tackle hard water.**

**Its compact footprint combined with state-of-the-art design make the IQsoft cabinet softeners a major breakthrough in the water treatment industry; no other water softener comes close to offering the same high-end specifications, ease of installation or soft water benefits!**

## **Maintain healthy-looking skin**

One of the biggest advantages of installing a water softener in your home is the fact that soft water is better for cleaning. That goes for your clothes and dishes as well as your skin. Soft water makes it easier for water to form a sudsy lather, and rinse it away just as thoroughly. That means your soap works more efficiently, and you aren't left with that pore-clogging soap residue all over your body.

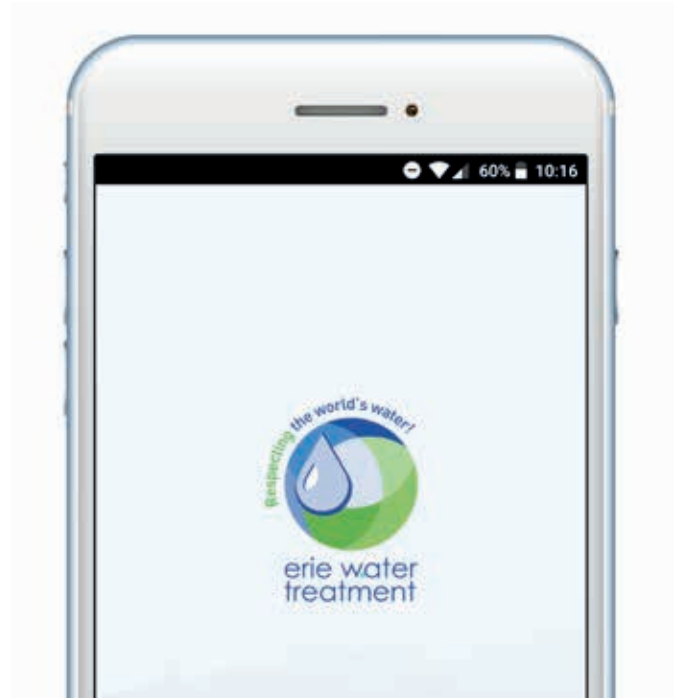

Moreover, a water softener will save you time and money. If there is no limescale to scrub away, cleaning time will be reduced. Plus, you won't need to buy as many cleaning products. If the water you use is free of calcium and magnesium, it won't leave behind any limescale. The result is all of your water-using appliances – such as dishwashers and washing machines, boilers, coffee machines, water boilers - will last much longer and work more efficiently. All of this has a favourable effect on your wallet, and the environment!

Therefore, choose what is best for yourself and what is best for Mother Nature.

# Discover the comfort of connectivity.

**To play music on our speakers or to control the thermostat, we find it perfectly normal to use Wi-Fi. Why not use your wireless network for vital necessities such as softened water?**

## **Monitor your water usage via your smartphone**

Our IQsoft water softener will give you perfectly softened water and at the same time the Wi-Fi technology will give you peace of mind by monitoring your water usage and managing your water softener via your smartphone or tablet. Leaving for holidays? With the Erie Connect App you can easily initiate the "Holiday Mode" and so avoid unnecessary consumption of water during your holidays.

Connect to your smart Wi-Fi enabled water softener and monitor:

- When the salt is low and needs refilling
- Your IQsoft water softener during your holidays by enabling the "Holiday Mode"
- Your daily water usage
- Liters of treated water remaining
- Your current water flow

The IQsoft water softeners are very user-friendly and easy to install. Besides that, the Wi-Fi application is an extra advantage that will help you to monitor the daily water usage of your family.

Therefore, choose comfort and give both you and your family peace of mind!

## WATER SOFTENERS

### USER-FRIENDLY

- Multilingual software.
- Legible display.
- Easy programming.
- Integrated handles for a simple and easy installation.
- Ultra compact footprint allowing installation even in the narrowest locations.  
(a width of 28cm and a depth of 44cm)

### UNIQUE FEATURES

- Exceptionally low rinse water usage per regeneration.
- Salt level alarm which visually informs you when the salt level needs to be checked.
- Unique technology that takes into account the aging of the ion exchanging resin so you always get the most accurate capacity of your IQsoft water softener.
- A holiday mode that avoids unnecessary consumption of water and regeneration salt during periods of absence, while assuring the resin bed is in optimal condition for service upon return.

- Programming the device can be done via your smartphone.
- Monitor your water softener and water usage from a distance.
- Receive an alert when your salt needs refilling.

technology for  
a perfect result!

## EarthSafe

TECHNOLOGY 

Erie Water Treatment has its own label to differentiate itself:

- the Earth Safe Technology-label. This label guarantees: The use of 'green' technology in all products, based on natural processes that don't harm the environment.
- That the use of Erie Water Treatment products results in important direct and indirect sustainable environmental benefits, such as better use of available water, energy saving, and reduced usage of harmful chemicals.
- Products designed and manufactured to operate with an unrivalled efficiency.

Earth Safe Technology gives businesses and consumers worldwide the opportunity to become 'greener'; to reduce their ecological footprint. Erie Water Treatment helps everyone to respect our precious water.

## WHOLEHOUSE FILTERS

### USER-FRIENDLY

- Multilingual software.
- Legible display.
- Easy programming.
- No need for maintenance & no filter replacement is needed.

### RELIABLE WATER TREATMENT

- Activated carbon as a natural and one of the most reliable ways of filtering water.
- Provide color and odor-free water.
- Remove chemical contamination from the water such as chlorines, residues of pesticides and herbicides.
- Remove all particles larger than 0,04 mm and extend the lifespan of water-using appliances.

#### **COMFORT**

Erie Water Treatment plays an important part in the global safeguarding of healthy drinking water. Whether it's water softeners, iron filters or whole house filters, Erie Water Treatment's products heighten people's level of comfort and living standards worldwide.

#### **ECOLOGY**

Erie Water Treatment generates large ecological benefits. We develop and commercialize products which contribute to optimal preservation of our most valuable natural resource: water. At the same time, these products have the utmost respect for the environment. We're proud to say that all production and development is done according to the principles of Earth Safe Technology.

#### **PARTNERSHIP**

All our products are marketed through our own, well-trained distribution partners. Erie Water Treatment thinks of and focuses on the long term. We value, cherish and nurture the relationships we have with our partners. At the end of the day we depend on each other: their success is our success.

#### **EXPERIENCE**

As one of the oldest companies in the water treatment industry, we have the right to say we have an unmatched wealth of experience we can tap into. Erie Water Treatment has been a pioneer and innovator in developing and producing water treatment devices for over 70 years.

## ABOUT US

Erie manufacturing company was founded on January 9th, 1943 when Henry Alfrey purchased the machinery and assets of a small manufacturing company at 200 East Erie Street in Milwaukee, Wisconsin (USA). Although the first products were emergency oxygen systems for military aircraft, Erie soon became a pioneer and innovator in 'devices to control flows', for application in oxygen, HVAC and water treatment systems.

In 1947 Erie was the very first company ever in the world, to develop and manufacture an automatic regeneration control valve for ion exchange water softeners. Shortly after the turn of the century, after almost 60 years of development and manufacture of control valves, the strategic decision was taken to focus on complete water treatment systems and solutions, for use in a wide range of applications, like residential, commercial hospitality,...

With product development, manufacturing and sales operations in the United States, Europe and Asia, erie water treatment is set out to remain at the forefront of the global water treatment industry. Today, erie water treatment is part of Aquion Inc. (Roselle, USA).
